

# Zourman Drums Roland™ hi-hat conversion module for 2box™ DrumIT Five

digitalDrummer

The 2box module has become popular among e-drummers, mostly for its real samples and open-source approach. And while the module is compatible with triggers from other manufacturers, users have largely been restricted to 2box's proprietary hi-hat controller.

The conversion products from Zourman Drums will enable 2box owners to use existing non-2box hi-hats particularly the popular Roland range.

Our conversion modules combines the best of both worlds: the Roland FD/7, FD-8, FD-9, VH-11, VH-12 or VH-13 hi-hat together with the 2box module.

The Zourman hi-hat conversion kit replaces a standard 2box hi-hat (hall effect sensor-ba-

sed) with your favourite Roland hi-hat. The solution is 100% plug and play (only 2box hi-hat calibration needed) and handles both a Roland hi-hat pad (bow/edge) and the hi-hat control pedal through the two input connectors. The Zourman electronics and intelligence combine the three trigger signals and deliver the output into a standard 2box hi-hat input

## Models

001 for Roland FD-7, FD-8, FD-9 and VH-11

003 for Roland VH-12

004 for Roland VH-13

005 for Roland FD-7, FD-8, FD-9 and VH-11 with Virtual Clutch

007 for Roland VH-12 with Virtual Clutch

008 for Roland VH-13 with Virtual Clutch
