

ZOURMAN DRUMS 64GB SD CARD for 2box

Many 2box owners feel the need to expand the memory of their module, and a 32GB sd card options has been around for a while. Now, Zourman Drums raises the bar with a 64GB option.

The solution consist of a 64GB SD Card (delivered and optimised by Zourman).

To find a working SD card for the 2box module can be a bit tricky – as has been discussed on the forums for decades. Both access time and internal memory setup determines if a card work or not. It is not fun when the card 'goes wrong', especially if it happens while you're playing a gig! The SD Card memory is essential to the function of 2box as it reads samples directly (no load time) and uses the SD card as RAM memory.

Zourman Drums have been able to source 64GB cards, which have been hard tested in our environments to secure the right function and provide a fault-free plug-play operation. The 64GB card option works with your DrumIt Three, old DrumIt Five MKI and of course MKII into a dream machine with all of your favorite sounds!

The cards have all been tested before delivery and are partitioned and formatted for 64GB - but they are delivered without 2box content due to copyright restrictions.

Zourman Drums best links to fill your SD Card with 32/64GB of good 2box sounds:

- Download the latest OS/Image/Content from 2box. <https://2box-drums.com/support/>
- Checkout and download more sounds from the 2box library of sounds. <https://2box-drums.com/sounds/>
- Checkout and download the eNerds 2box kits – (And please send some bucks for a great job) <http://endre-enerd.com/index.php/tech-info/sounds?lang=en>
- Checkout and buy some Zourmans snare samples. (Some lighter versions are included in the 2box OS/ Image as examples) <https://zourman.com/products/studio-samples-by-drum-force-zourman/>
- Move your best VST kits from leading vendors of drums samples to 2box DSND format (SD3, AD2, Steven Slate etc) by using Lustark SDSE tool. <https://www.lustark.com/>
- Create your own samples using the great 2box editor <https://2box-drums.com/editor/>
- Pull together and create your best kits from all the sounds above using Lustarks DrumIt Manager! <https://www.lustark.com/>

Some notes:

- The mod is done on your own risk!
- Don't use the USB connection when using SD cards larger than 4GB – the content on the card will be erased immediately when attaching the USB cable to a computer!
- Please be sure your module is running Boot Loader 1.30 or later, the earlier 1.10 boot loader may not be compatible. (Auto updated with newer OS from 2box)
- The SD extender cable is labelled 16GB – but works fine for larger memory amounts.
- The 2box image/software/content must be downloaded directly from 2box. (Not included or installed to avoid violating any copyright)
- If you want to copy content from an old card including 2box settings – Make a backup first! – Then copy the OS (DrumItOS*.bin and globalconfig.dcfg) from your DrumIt 3 to the 32GB card.
- The SD card has been partitioned and pre-formated for use in 2Box. Please don't reformat the SD card - all partition information will be destroyed and this will make the 64GB unusable.
- This product has limited support from Zourman Drums. (Best efforts)

Support & Limited Warranty

Please submit any questions or suggestions via the <http://www.zourman.com> site or search for the zourman area at the <http://www.2box-forum.com>. The limited return to base warranty for all Zourman equipment is 12 months from purchase date.
